

## USER STORIES

### Story 1: Add a Job Application

**User Story:** As an admin/recruiter, I am able to add a new job opportunity, so that I can have job seekers applying for it.

#### Wireframe:

- A form page with fields such as company name, job title, deadline, description, and required skills. A "Save" button to store the application.

The wireframe shows a web application interface for adding a new job. At the top is a navigation bar with the logo 'JOBSITE' and links for Home, Jobs, Reminders, My Profile, Support, and a Log out button. Below the navigation bar is a header section with a back arrow and the text 'CREATE A NEW JOB:'. The main form area is titled 'Company Name' with an 'Edit' link. Underneath is a section titled 'Hiring Details' which contains a table with two columns: 'Job Title' and 'Job Overview'. The 'Job Title' column has input fields for 'Department', 'Reports To', 'Location', 'Salary Range', and 'Deadline' (with a calendar icon). The 'Job Overview' column has input fields for 'Description' and 'Qualifications'. A modal dialog box is displayed in the center of the form, showing the message 'Successfully saved!' and an 'OK' button. At the bottom of the form are two buttons: 'Save' and 'Cancel'.

#### Acceptance Criteria:

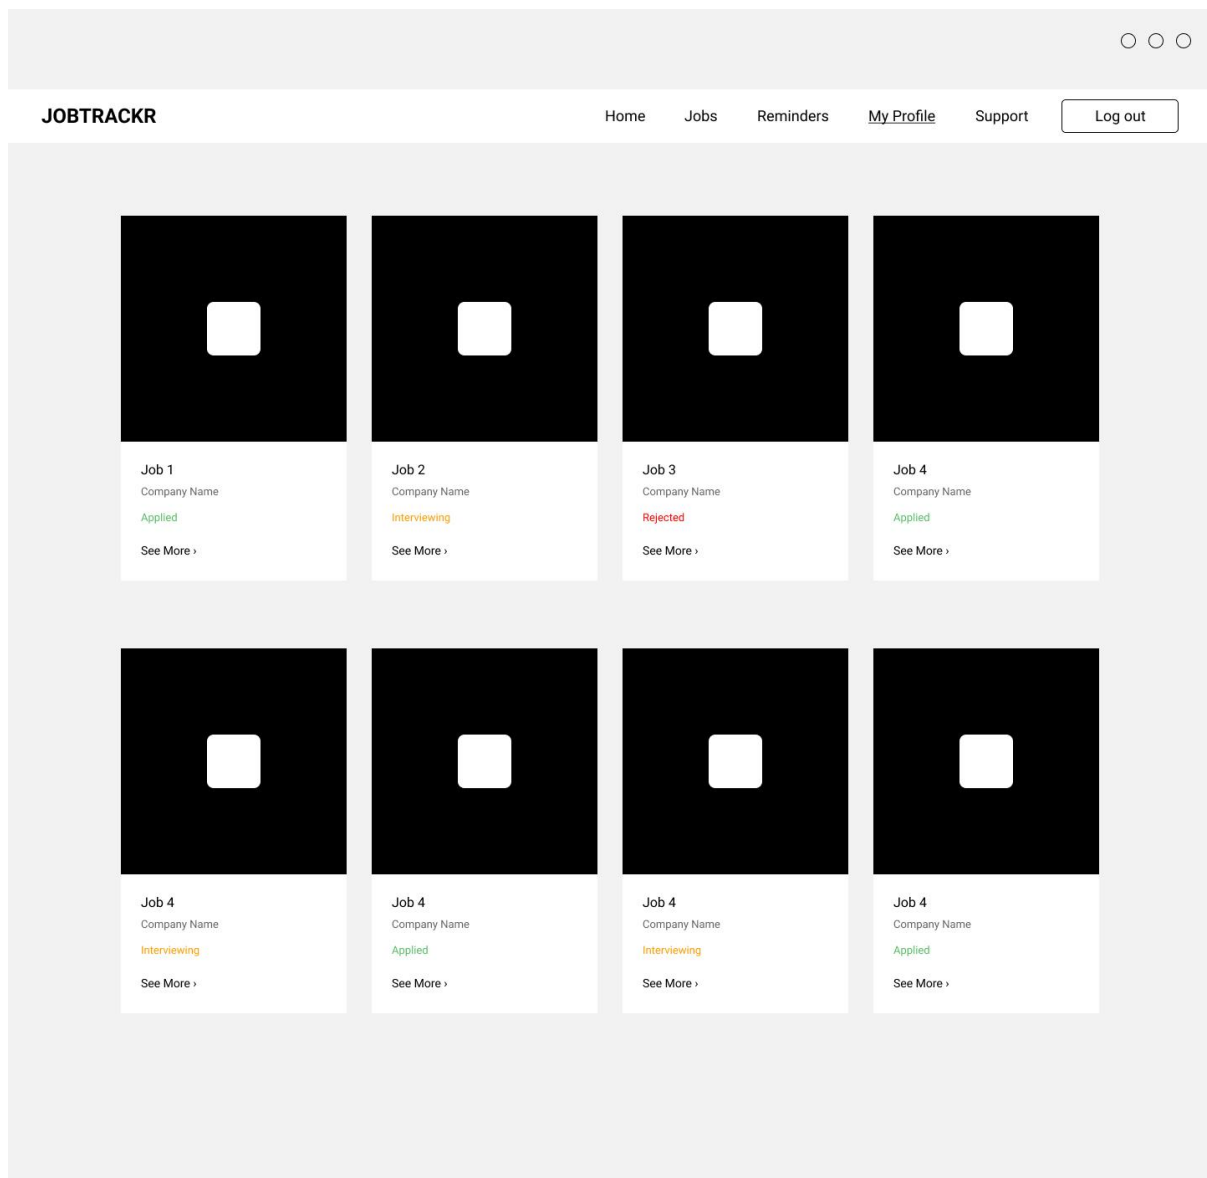

- An admin/recruiter can input all necessary fields (company name, job title, date, and status).
- The form validates required fields before saving.
- The application is saved and displayed in the user's/jobseeker application overview.
- Success message is shown once a job is added.

## Story 2: View Application Overview

**User Story:** As a job seeker, I am able to view an overview of all my job applications, so that I can keep track of where I am in the application process.

### Wireframe:

- A dashboard displaying a list of all job applications.
- Status indicators for each application (e.g., Applied, Interviewing, Rejected).
- Sorting and filtering options (e.g., by date or status).

### Acceptance Criteria:

- A user sees all saved job applications in a list view.
- Applications can be sorted by date, job title, or status.

- Filtering options allow users to view only applications in certain statuses.
- A user can click on an application to view more detailed information.

### Story 3: Set Reminders for Follow-Ups

**User Story:** As a job seeker, I am able to set reminders for follow-ups, so that I can ensure timely actions on my job applications.

#### Wireframe:

- A reminder form with fields like date and time for follow-up.
- A reminder notification or calendar icon next to each application in the overview.

The wireframe shows a web application interface for 'JOBTRACKR'. The top navigation bar includes links for Home, Jobs, Reminders (active), My Profile, Support, and a Log out button. The main content area displays details for a 'Junior Software Engineer' job application. On the right side of the job details, there is a 'Set Reminder' button with a bell icon. A mouse cursor is pointing at this button. A modal form is open, showing a date picker. The date '08/17/2023' is entered in the 'Date' field. Below the date field is a calendar grid for August 2023, with the 17th highlighted. The modal also includes a 'Clear' button and 'Save' and 'Cancel' buttons at the bottom.

#### Acceptance Criteria:

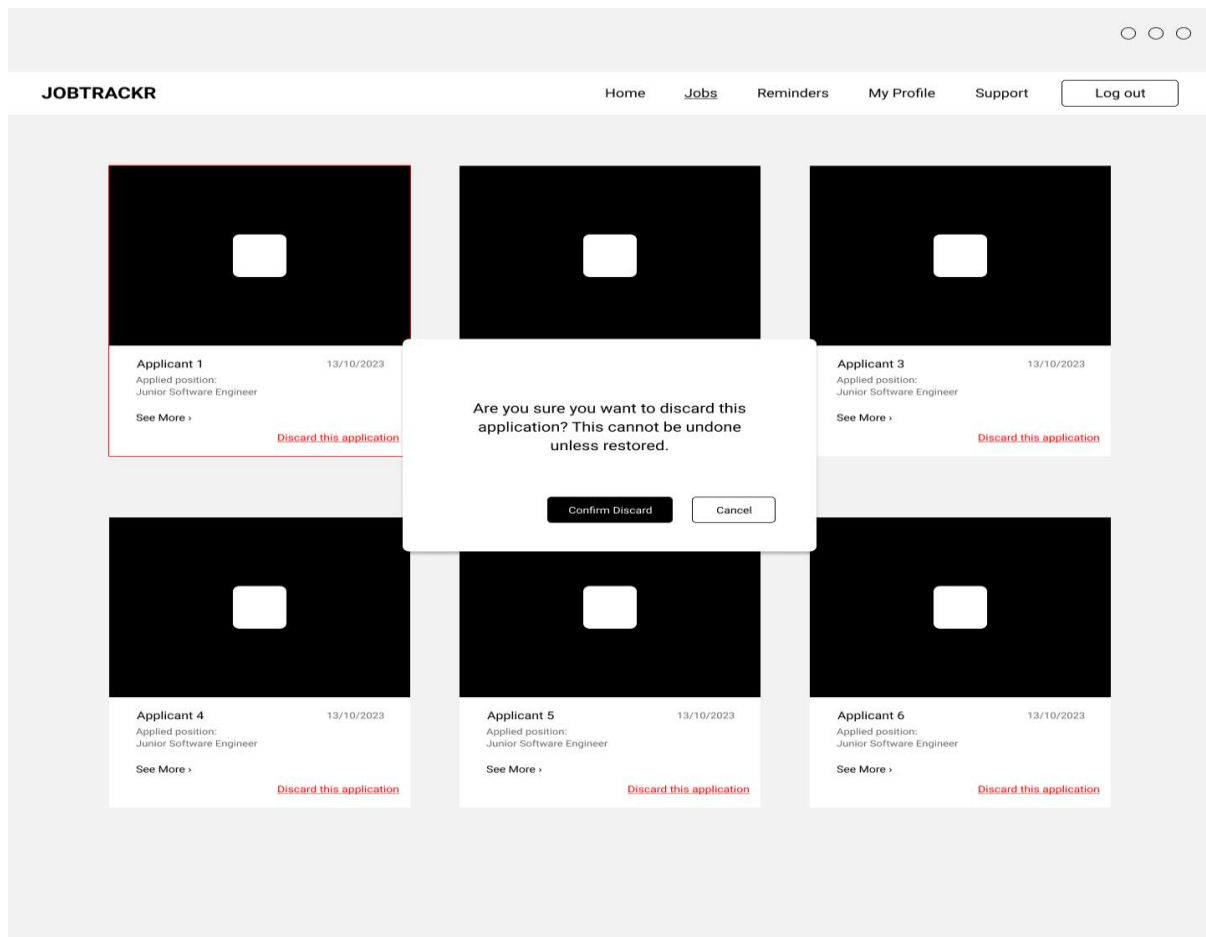

- A user can set a follow-up date for each job application.
- The system provides notifications or reminders when the follow-up date arrives.
- A user can update or remove reminders if needed.

### Story 4: Discard applications

**User Story:** As an admin/recruiter, I am able to discard user applications that I don't think fit the position so that I can keep only the ones I really want.

**Wireframe:**

- Confirmation Dialog, pop-up to confirm discard action, explaining that the application will be moved to the discarded list and can no longer be considered unless retrieved.
- Discard Application Button, Clear and visible "Discard" button next to each application on the list.

**Acceptance Criteria:**

- Application Status Change, when an application is discarded, its status is changed to "Discarded."
- Undo Discard, Admin/recruiter can restore an accidentally discarded application by moving it back to the main list.
- Discard Application, The admin/recruiter can discard an individual application by clicking a "Discard" button.

**Story 5: View Progress Timeline**

**User Story:** As a job seeker, I am able to view a progress timeline for each job application, so that I can visualize how far along I am in the hiring process.

## Wireframe:

- A visual timeline next to each application with key events (e.g., Applied, Interview Scheduled, Rejected).
- Progress bars indicate the completion level of each application.

The wireframe shows a web application for tracking job applications. The header includes the brand name 'JOBTRACKR' and navigation links: Home, Jobs, Reminders, My Profile, Support, and a Log out button. The main content area displays three job application cards. Each card features a placeholder image, the job title, company name, and location. A horizontal timeline shows the progression through four stages: Applied, Screen, Interview, and Offer, with specific dates for each. The first card is for 'Junior Software Engineer' with dates 10/08/2023 and 18/08/2023. The second card, 'Job 2', has dates 13/08/2023, 16/08/2023, and 19/08/2023, and includes an expanded view with an 'Application Status' dropdown (set to 'Screen'), a 'Date' field (13 August 2023), an 'Additional Notes' text area, and 'Archive', 'View Details', and 'Update' buttons. The third card is for 'Job 3' with dates 14/09/2023 and 15/09/2023. The timeline uses green circles and lines to indicate completed steps and a grey circle for the current step.
